ASSOCIATE OF SCIENCE IN BUSINESS ADMINISTRATION

PROGRAM BROCHURE

PROGRAM DESCRIPTION

The Associate of Science in Business Administration (ASBA) degree program aims to prepare students to begin or advance their careers in the business world. The program provides students with a basic understanding of business through an appropriate blending of business and general education. It also introduces the principles of the Christian worldview. The ASBA degree program can also be a major step towards completing a bachelor's degree. All courses completed from the IAU ASBA degree program shall be waived for the IAU BBA degree program.

ADMISSIONS REQUIREMENTS

Education: IAU requires either evidence of an earned high school diploma, General Educational Development (GED) test, or the successful completion of 12 semester units earned at an appropriately accredited postsecondary institution or foreign equivalent. Exceptions may be made on a case-by-case basis.

Professional Experience: IAU recommends any experiences, including but not limited to, internships, externships, volunteer, or part or full-time professional experience in any organization, including, but not limited to, private, public, for-profit, non-profit, start-ups, or established corporate organizations.

Evidence of English Proficiency: IAU requires writing skills at the appropriate level. Proficiency in reading, writing, speaking, and understanding English is essential to your success at IAU. If English is not the applicant's native language, or if an applicant has not had their secondary education taught in English, they will be required to provide proof of **English Proficiency**. Since classes are taught in English, an applicant must demonstrate their ability to read, write and speak English.

Information Technology: IAU requires students to possess computer and internet skills sufficient to effectively participate in IAU's pedagogical model and conduct research at the undergraduate level.
